

## **Audio / Video Recording Instructions**

I am SO excited to have you in CPC Kid's Music! In order to create our final products for worship services, you will need to record yourself singing at home during rehearsals.

This document will help you make those recordings and submit them!

What you will need:

- Headphones
- Two devices-
  - One device will be used to log on to our zoom call- a tablet or computer
  - One device will be used to record audio- a phone or separate tablet

### **Step-by-Step Instructions:**

1. Open an audio recording app on your recording device (Voice Memo for iPhone or iPad).
2. Put your headphones in and connect them to the device that you will use to participate in our Zoom rehearsal, preferably a computer or tablet.
3. At the beginning of rehearsal, I will tell you to press "Record" on your recording device. Set it down where it clearly records your voice (it's sometimes a Goldilocks "too close, too far" situation- you may want to play around with the positioning of your recording device before rehearsal). Once you have started recording, don't touch it!
4. Wearing your headphones, you will sing along and participate with our rehearsal. Your audio device will be recording the whole time.
5. At the end of rehearsal, I will instruct you to stop recording. You should now have an audio recording that is JUST your voice with NO piano or background noise. This is good!! We only want your voice, even if you think it doesn't sound perfect. Trust me!
6. Upload this recording to the Google Drive folder. This is different on each device- I will be available for questions and help during Week 1's upload.

I'm so glad to join you again in music and prayer. See you soon!
